We help our clients to achieve their strategic business goals via our technical ingeniousness, proven domain experience, and project management skills.

## ***What is Odoo?***

Odoo also is known as Open ERP. The application was founded by Fabien Pinckaers in 2005. The word Odoo is the acronym of On-Demand Open Object. Odoo is a large collection of business-related applications and modules like CRM, Sales management, E-commerce, Warehouse management, Purchase management, Accounting/Finance management or , Manufacturing management, HRMS, etc. All these basic modules are collectively called Enterprise Resource Planning software.

Apart from its **52 main basic modules**, Odoo has more than **25,000+ third party Apps/Plugins** available in its app store. Each of them is custom-built for different user needs. These applications stand ahead of time and fulfill every business requirement. Today **Odoo ERP has more than 5+ million users** ranging from SMEs, start-ups and larger enterprises. The user list includes leading brands like Toyota, Hyundai, and PCI.

Odoo modules are made accessible online, which can be easily downloaded and assessed. Adding further, there are more than 1500 dynamic members (both technical and functional) working on Odoo platform, constantly upgrading its framework and extending functionality, to cater to the wide assortment of business needs. Today, Odoo is one of the widely used open-source ERP solutions in the market.

*Why is Odoo becoming more and more popular?*

- Easily adaptable software for any industry type.
- Cost-effective compared to proprietary ERP models.
- Freedom from licensing costs(Community Edition).
- No fear of Vendor Lock-in.
- Large customization and integration possibilities.
- Upgrades and improvisations with each version release.
- Unlimited functional support if deployed at the enterprise level.
- A Timeline software.
- Scalability and Modularity
- Global Support from Odoo forum and mailing lists.
- Highly user-friendly UI.
- Industry-Specific Modules
